SUMMARY

Creative and task-driven web developer leveraging background in healthcare to solve complex problems with critical thinking, effective communication, and teamwork. Skilled in designing user interfaces, developing databases, and troubleshooting issues. Fast learner and even harder worker seeking an opportunity to build responsive applications and find high-quality solutions.

PROJECTS

Seat Down — *Built with React, Material UI, Node, Express, MySQL, JawsDB, Heroku*

An office management system, specifically designed for a post-Covid hybrid working environment with in-person and remote employees.

Hype Type — *Built with React, Redux, Material UI, Node, Express, MySQL, JawsDB, Socket.IO*

An interactive typing test that shows live updates of the user's accuracy and words per minute scores and saves the scores to the user's dashboard.

SF Watch — *Built with HTML5, CSS, Semantic UI, jQuery, AJAX, Leaflet*

An application that maps police and fire incidents by date and also displays Covid updates and testing sites to help users in San Francisco to stay safe and informed.
